

TASK 5

CURRENT ASSESSMENT OF KNOW-HOW RELATED WITH THE COMPETENCE-BASED QUALIFICATION SYSTEM

Earlier today competences were analysed from the basis of the nature of competences and the elements related with competences.

Analyse the competence-based qualification standards / description in groups:

1. Are we able to piece together from the documents how the nature of competences is understood in the competence-based qualifications?
2. How the different elements of competences are present in the qualification? Have some elements been highlighted, are some missing?
